Reasons for Allowance**Claims 12-22, and 24 are allowed.**

The following is an examiner's statement of reasons for allowance: as to claims 12,17,22, and 24, the prior art of record does not teach nor render obvious the overall claimed combination of a breathing gas supply system for supplying breathable gas in an aircraft including an oxygen enriching apparatus which is operable in at least two modes to provide product gas with varying oxygen concentrations, a first feed line to feed more highly enriched product gas to one or more breathing gas outlets, and a second feed line to feed less highly enriched product gas to an aircraft cabin for breathing during normal high altitude flight, and a controller to control the oxygen enrichment apparatus to provide highly enriched product gas to an aircraft cabin for breathing during normal high altitude flight, and to control a diverter valve which directs the product gas to the respective feed line. Therefore, the invention defined in claims 12-22, and 24 is considered novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Crome (US 2003/0233936 A1) pertains to oxygen gas generator for aircraft.
